

# XIV Spanish Drug Discovery Network Meeting

## Granada, 24-25<sup>th</sup> November, 2022

### Please, save the date!

The XIV meeting of the Spanish Drug Discovery Network (SDDN) will take place in Parque Tecnológico de la Salud (PTS) / Universidad de Granada, in Granada, Spain, on November 24 and 25, 2022. This international conference has turned out to be an ideal forum for the early drug discovery community, both from Academia and Industry. Every year we select a limited number of topics with the idea to facilitate an “in-depth” discussion among professionals with very different backgrounds, but all focused on advancing the frontline of drug discovery and translational medicine research.

This year, the programme will focus on four scientific areas that are continuously evolving and increasingly having an impact on drug discovery: Targeted Protein Degradation, Nucleic Acids as Therapeutic Agents, Antimicrobial Resistance and New Antibiotics, and Biologics in Drug Discovery and Development. We will also include a session to discuss about How to potentiate Drug Discovery in Spain.

### Scientific and Organizing Committee

Olga Genilloud (Fundación MEDINA), Ana Martinez (CSIC), Emilio Díez (e10bio), Jorge Beleta (SDDN), Marie-Hélène Larraufie (Almirall), Tamara Martinez (Sylentis), Domingo Gargallo (ABAC Therapeutics), Francesc Mitjans (Leitat), Julio Martin (Sciengement Lab Consulting), Jordi Quintana (Chemotargets). Gijs Jochems (Promega)

### Preliminary Programme

#### Session 1. Targeted Protein Degradation

Chair: Marie Helène Larraufie, Almirall

#### Session 2. How to Potentiate Drug Discovery in Spain

Chair / co-Chair: Emilio Díez (e10bio) / Jorge Beleta (SDDN)

#### Session 3. Nucleic Acids as Therapeutic Agents

Chair: Tamara Martinez (Sylentis)

#### Session 4. Antimicrobial Resistance and New Antibiotics

Chair: Domingo Gargallo (ABAC Therapeutics)

#### Session 5. Biologics in Drug Discovery and Development

Chair: Francesc Mitjans (Leitat)
